

FACTSHEET

Teesport

Teesport is located less than a mile from the mouth of the River Tees. It's a deep-water facility with a natural marine opening, providing lock-free access to the North Sea.

Fewer areas of the UK are better served by road and rail services. Teesport has direct access to the A66 Trans-pennine East and West routes and A19/A1 M1 national motorway links for North and South. This is complemented by direct rail links via the East Coast Main Line and Trans-Pennine routes to all parts of the UK.

Teesport handles over 5,000 vessels each year and around 35 million tonnes of cargo. The port estate covers some 588 acres and is an integral element of the wider industrial area.

Steel, petrochemical, agribulks, manufacturing, engineering and high street commerce operations are all supported through Teesport. In addition the port supports a burgeoning renewable energy sector – in both production and assembly facilities - all of whom utilise the port's warehousing, logistics and excellent supply chain expertise.

The High Tide Foundation is a registered charity, created and driven by port-related businesses to provide opportunities for the young people of Teesside
